

Exploring our Futures of health and care in Lambeth and Southwark

29th March: Strategy Stimulus - "Where are we now?"

1215 for 1300 to 1700, Coin Street

The first event will look closely at the core challenges within the population of Lambeth and Southwark, and consider the implications of these for the future. We will look at the current pattern of health services, the way in which they are evolving, and the degree to which they address our population's needs. We will also reflect on the evidence about models of care - particularly the shifts towards more integrated and community based models of care. This event will provide the bedrock of evidence to underpin the future scenarios and ensure they are connected to our local population and their needs.

The event will be externally facilitated, with expert input from Chris Ham and Nigel Edwards from The King's Fund. RAND Europe will provide underpinning data analysis, giving fresh insight to our population across the life course, from birth to end of life.

Proposed outline

1pm Formal Start (lunch from 1215)

Nigel Edwards, Kings Fund – facilitator

Peter Hewitt and Oliver Smith, Guys and St Thomas' Charity

Vox Pop: the voice of (some) local people

Group discussion: strengths and challenges

Understanding our population:

the diagnosis (need and demand – and services)

[Presentation](#) from Peter Burge, RAND Europe

Work in groups: Strengths to build on

1445 Break

What is happening to our services?

Pictures of the future in the present?

[What can we learn from others here and abroad](#) - Chris Ham, Kings Fund

[Redesigning the system: What's the opportunity?](#) - Nigel Edwards, Kings Fund

Group work: Challenges

Group work feedback facilitated by Nigel

Next steps in the Exploring our Futures project

eg Ideas for good practice to the project [www](#); future meetings (4 May etc)

Conclusion and reflections Ollie

5pm Close
